

Resin Bonded Abrasive Cutting Wheel

This resin grinding wheel is designed for cutting applications on various materials. It is constructed with abrasive grains bonded by resin, providing efficient material removal and a smooth finish.

Product Overview

High-Performance Cutting Wheel

This resin bonded abrasive cutting wheel is engineered for precision and efficiency in metal cutting applications. Constructed with fiber-reinforced resin, it provides exceptional durability and resistance to wear for a longer service life. Designed for compatibility with standard angle grinders, this wheel ensures consistent performance and a smooth finish across various metal materials.

Technical Specifications

Maximum Speed	8500 RPM
Abrasive Grade	A/S 60 T-BF

Product Features

Construction	Fiber Reinforced, Resin Bonded
Primary Application	Metal cutting

Compliance

Safety Compliance	Yes
