Product Overview

Application

The system provides reliable theft deterrence across various retail and library settings.

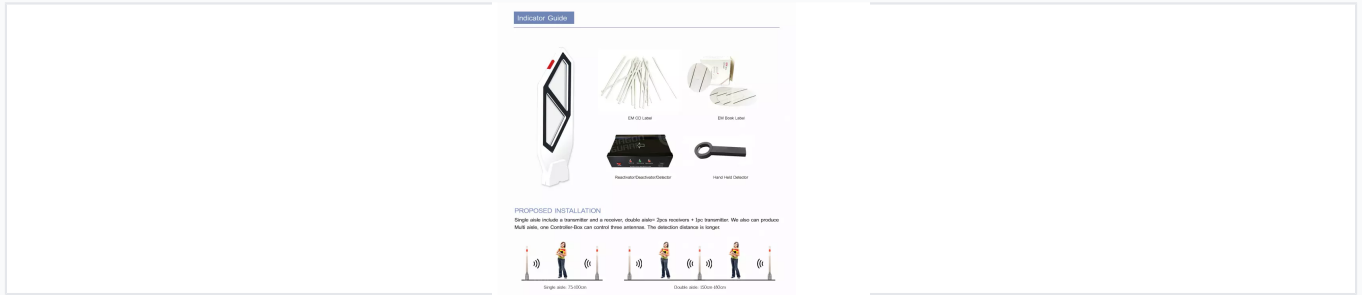

Professional Retail & Library Security

This high-quality EAS system gate provides robust anti-theft protection for retail stores and libraries. Utilizing advanced electromagnetic (EM) technology, it ensures reliable detection of security labels while maintaining a sleek, modern aesthetic that integrates seamlessly into professional environments. The system is designed for high-traffic areas, offering effective loss prevention and enhanced inventory control.

Technical Specifications

Unit Dimensions	152 x 44 x 3 cm
Material	Advanced Resin Glass
Working Voltage	110V - 240V
Working Environment	-20°C to 60°C

Detection Performance

System components including EM labels, detectors, and proposed single/double aisle installation layouts.

Performance Metrics

170 cm

Detection Height

80 cm

Detection Width

Installation Configurations

Configuration	Components	Detection Distance
Single Aisle	1 Transmitter + 1 Receiver	75 - 100 cm
Double Aisle	1 Transmitter + 2 Receivers	150 - 180 cm
Multi Aisle	1 Controller-Box + 3 Antennas	Extended Range

Customization & Features

Various gate designs available including models with integrated people counters for traffic analysis.

Extensive customization options including frame materials, alarm lights, and advertisement placements.

Customization Options

- Logo integration
- Custom color choices
- Shape variations
- Assigned PCB board
- Alarm light configuration
- Frame material selection
- Cable length adjustment
- Advertisement placement

Smart Features

People Counter Available, EM Technology, OEM Accepted

Compliance & Logistics

Certifications

CE • ISO • ROHS • SGS • MSDS

Packaging Details

1 set/ctn, 24kg/ctn, 158*50*18cm

Supply Ability

100 Sets per Week
