

# Retail Display Stand with Perforated Back Panel

This metal display stand features a perforated back panel for attaching hooks and a base shelf for additional support. It is designed for use in retail environments to effectively showcase products.

## Product Overview

### Versatile Retail Merchandising Solution

This durable metal display stand is designed to optimize retail space and enhance product visibility. Featuring a perforated back panel, it offers flexible configuration for various hook placements and shelving options. The integrated base shelf provides sturdy support for heavier items, while the top canopy area is perfectly positioned for branding and promotional signage.

## Key Features

### Design Features

- Perforated back panel for modular hook placement
- Integrated base shelf for inventory storage
- Top canopy for branding and signage
- Durable metal construction

### Ideal Applications

Retail Stores, Supermarkets, Showrooms, Promotional Displays
