

Retail POS Terminal with Integrated Cash Register

This combination device merges a point-of-sale (POS) terminal with a cash register. Designed for retail, it supports transaction processing, receipt printing and business management functions.

Overview

Integrated POS Solution

This all-in-one retail POS terminal combines a high-performance cash register with essential business tools. Designed specifically for efficient retail environments, the unit features an integrated receipt printer, alphanumeric keypad, and a dedicated display screen. The inclusion of a telephone handset adds a unique layer of communication capability, making it a versatile hub for transaction processing and customer service.

Hardware Features

Integrated Components	Receipt Printer, Telephone Handset, Alphanumeric Keypad, Display Screen
