

Retract Threaded Button Drill Bits

These retract threaded button drill bits are engineered with alloy steels and tungsten carbide. They are designed for rock drilling in mining and construction applications.

Product Overview

High-Performance Retract Threaded Button Bits

These retract threaded button bits are engineered for high-efficiency rock drilling across mining and construction environments. Featuring a specialized retract design, these bits allow for easier removal and replacement, which helps minimize operational downtime. The inclusion of strategically placed tungsten carbide buttons ensures optimal rock fragmentation and consistent performance in various drilling conditions.

Technical Specifications

Diameter Range

51 mm

Minimum Diameter

152 mm

Maximum Diameter

Available Face Tapes

- Flat front
- Drop center front
- Uni-face

Available Thread Sizes

R32, SSR32, R35, SSR35, R38, T38, T45, T51, SST58, SST68, SGT60
