Product Overview

Versatile Crowd Control Solution

The Retractable Belt Cone Topper is a highly efficient tool designed to cordon off work areas quickly. Engineered to fit standard traffic cones, it provides an instant, flexible barrier for construction sites, roadside maintenance, and engineering projects. With its 4-way connection capability, it allows for scalable and adaptable crowd control management in any environment.

Technical Specifications

Connection Capability	4-way connectivity
Material	Durable plastic
Usage Environment	Indoor, Outdoor, Construction Sites, Roadside Maintenance, Engineering

Features

Key Features

- Retractable belt mechanism
- Fits standard traffic cones
- Lightweight and portable
- Easy deployment and storage
