Product Overview

Versatile Crowd Control Solution

The Retractable Belt Cone Topper is an essential tool for cordoning off working areas and managing pedestrian flow. Designed for universal compatibility with standard traffic cones, it offers a quick and effective way to restrict access in high-traffic zones. Its 4-side connection capability allows for flexible barrier configurations, making it ideal for construction sites, roadside maintenance, and engineering applications.

Technical Specifications

Connection Points	4 sides
Visibility Features	Red and White Striped, High Visibility

Usage & Applications

Suitable Environments

- Construction sites
- Roadside maintenance
- Engineering applications
- Parking areas
- Event crowd control

Primary Function

Temporary Barrier • Restricted Access • Crowd Control
