

Retractable Cable Reel with Four Schuko Sockets

This portable cable reel is designed for indoor use. It features four Schuko sockets with safety shutters, a retractable cable, and overload protection.

Overview

Versatile Power Solution

This retractable cable reel is a compact and portable solution designed specifically for indoor power distribution. It features four Schuko sockets equipped with safety shutters, allowing for the simultaneous operation of multiple devices while maintaining high safety standards. The built-in overload protection and retractable mechanism make it an essential tool for organized and safe power access in homes, offices, and workshops.
