Product Overview

Professional Dual-Blade Utility Knife

This heavy-duty utility knife is engineered for versatility and durability in demanding work environments. Featuring a robust stainless steel construction paired with an anodized aluminum body, it ensures long-lasting performance for cutting cardboard, plastic, and other industrial materials. The ergonomic handle design prioritizes user comfort and safety, while the quick-release mechanism allows for efficient blade exchanges during high-volume tasks.

Construction & Materials

Design Features

- Ergonomic handle for comfort and control
- Quick-release blade exchange system
- Retractable blade mechanism
- Locking mechanism for secure operation

Materials

Stainless Steel, Anodized Aluminum

Functionality

Blade Configuration

Dual Blade • Retractable

Ideal Applications

- Cardboard cutting
- Plastic material processing
- General heavy-duty utility tasks
