

Retro Style Electric Scooter with 35W Headlight

This electric scooter features a retro design enhanced by modern color schemes. It is equipped with an aerospace-grade cylinder for durability and operates quietly with excellent lubrication.

Product Overview

Retro Aesthetic Meets Modern Utility

This electric scooter combines a classic, streamlined retro design with modern engineering to deliver a stylish and efficient ride. Built with an aerospace-grade cylinder, it offers superior durability, heat resistance, and quiet operation with low fuel consumption. Designed for convenience, it features a low 720mm seat height for easy mounting and a spacious 17L storage compartment that accommodates a 12-inch laptop.
