

Reusable Half Face Mask - REP601

This reusable half face mask is CE EN 140 certified. It provides a secure and comfortable fit, ensuring effective filtration of airborne particles and contaminants.

Product Overview

Professional Respiratory Protection

The REP601 reusable half face mask is engineered for high-performance respiratory protection against particulates, gases, and vapors. Constructed from durable thermoplastic elastomer, it offers a secure fit and low breathing resistance for enhanced user comfort during extended use. This CE EN 140 compliant respirator features a 4-point adjustable headband and a compact profile to ensure maximum visibility for industrial operators.

Compliance and Safety
