

Reusable Half Mask Respirator

This half mask respirator is a reusable respiratory protective device. It provides reliable protection against particulate matter, gases, and vapors.

Product Overview

Professional Respiratory Protection

The HM301 Half Mask Respirator is a high-performance, reusable protective device engineered for industrial, construction, and agricultural environments. It offers reliable defense against particulate matter, gases, and vapors through a robust, flexible design that ensures comfort during extended wear. Featuring a dual-filter system and an efficient exhalation valve, this mask minimizes breathing resistance while effectively managing heat and moisture buildup.

Technical Specifications

Protection Scope

- Particulate matter
- Certain gases
- Certain vapors

Design Type	Reusable Half Mask
Filter System	Dual-filter design
Exhalation Valve	Yes
Recommended Applications	Industrial, Construction, Agriculture

Key Features

Comfort and Usability

Durable Material • Flexible Fit • Moisture Reduction • Replaceable Filters
