

Reverse Discharge Cone Concrete Mixer

This concrete mixer features a reverse discharge mechanism for easy unloading. Its cone-shaped drum ensures consistent mixing quality and minimizes material segregation.

Product Overview

JZM750 Reverse Discharge Concrete Mixer

The JZM750 is a high-performance reverse discharge cone concrete mixer engineered for consistent and efficient concrete production. Featuring a specialized cone-shaped drum, it ensures thorough mixing while minimizing material segregation. Built on a robust frame for maximum stability in demanding construction environments, this unit is an ideal solution for medium to large-scale projects.

Technical Specifications

Model Number	JZM750
Discharge Mechanism	Reverse Discharge
Drum Shape	Cone

Key Features

Core Features	Reverse Discharge, Cone-Shaped Drum, Robust Frame, Control Panel Operation
---------------	--

Application

Ideal For

- Medium-scale construction
- Large-scale construction
- Consistent concrete production
