Overview

High-Performance Reverse Gear Chain

This precision-engineered reverse gear chain is specifically designed for 500cc engines, providing reliable power transmission for reverse gear functionality. It is built to withstand demanding off-road conditions, ensuring smooth operation and long-lasting durability. Ideal for professional maintenance and repair of high-displacement utility and recreational vehicles.

Technical Specifications

Precision-engineered chain designed for the reverse gear mechanism of 500cc engines.

Engine Compatibility

500 cc

Engine Displacement

188 CF

Engine Model

Primary Function

Reverse gear power transmission

Application & Compatibility

High Quality, Low Cost

High-quality transmission chain suitable for ATV, UTV, and Gokart applications.

Supported Motor Models

- CF188 500cc
- CF 500 Motor

Compatible Vehicle Types

ATV, UTV, Gokart, Off-road Vehicles

Build Quality

Performance Features

Precision-Engineered • Heavy Duty • Smooth Operation • High Durability
