

Reverse Osmosis Water Storage Tank

This water storage tank is designed for reverse osmosis systems. It is available in 2.0G, 3.0G, 3.2G, and 4.0G capacities.

Product Overview

Reverse Osmosis Storage Solution

This specialized water storage and delivery tank is designed for high-performance reverse osmosis systems. Engineered for durability, it supports a maximum working pressure of 100 psi to ensure reliable flow and consistent water availability. The tank is an essential component for residential and commercial purification setups, offering robust construction for long-term integration.

Technical Specifications

| | |
|--------------------------|---------------|
| Model | RO-3.0G |
| Maximum Working Pressure | 100 psi |
| Required Air Charge | 5-7 psi |
| Product Barcode | 6945377500057 |

Compatibility

Available Tank Capacities

- 2.0G
- 3.0G
- 3.2G
- 4.0G
