

RG Chrysanthemum Twinkling Laser Light 140mW

This laser light emits a mixed yellow color through its red and green lasers. The light has a red laser power of 100mW and a green laser power of 40mW.

Product Overview

Dynamic Stage Lighting

The 140mW RG Chrysanthemum Twinkling Laser Light is a specialized stage lighting effect designed for professional entertainment and performance environments. It projects a dynamic display of combined red and green laser beams, creating a complex, twinkling chrysanthemum-like pattern. This unit is an ideal solution for enhancing the visual ambiance of stage productions, clubs, and event venues.
