

# RG11U Dual Coaxial Cable

RG11U dual coaxial cable is designed for demanding applications requiring high-performance signal transmission. It features a robust construction with braided shielding and a central conductor.

## Overview

### Professional Grade RG11U Dual Coaxial Cable

The RG11U Dual Coaxial Cable is engineered for high-performance signal transmission in demanding industrial and commercial environments. Featuring a robust, durable white outer jacket and advanced braided shielding, it ensures minimal signal interference and long-term reliability. Its high-quality central conductor design makes it an ideal solution for complex cabling infrastructures requiring consistent data integrity.

## Technical Specifications

Cable Type	RG11U Dual Coaxial
Outer Jacket Color	White
Construction Features	Braided Shielding, Dual Coaxial Design, Robust Jacket
