

RG59 Coaxial Cable for Signal Transmission

This RG59 coaxial cable is designed for transmitting video and data signals. It features braided shielding, a solid core conductor and foam dielectric insulation for optimal signal integrity.

Product Overview

High-Performance RG59 Coaxial Cable

This RG59 coaxial cable is engineered for reliable signal transmission in CCTV and CATV applications. Featuring a solid core conductor and foam PE dielectric insulation, it ensures optimal signal integrity and minimal interference. Designed for versatility, this cable is available in various lengths and packaging options to suit professional installation requirements.

Technical Specifications

Inner Conductor Diameter	0.65 mm
Dielectric Diameter	3.8 mm
Outer Conductor Diameter	4.05 mm
Outer Jacket Diameter	6 mm
Conductor Material	BC, CCS
Dielectric Material	Foam PE
Shielding	48 x 0.12 mm AL-Me wire
Jacket Material	PVC

Logistics & Options

Available Jacket Colors

Black • White

Packing Modes

- Ring
- Wooden drum
- Pallet
- Plastic spool

Packing Lengths	10m - 500m
