

RG6 Coaxial Cable

This RG6 coaxial cable is designed for reliable signal transmission. It is suitable for cable television, satellite TV, and broadband internet applications.

Overview

High-Performance RG6 Coaxial Cable

This 5C-2V RG6 coaxial cable is engineered for reliable, high-bandwidth signal transmission across various professional and residential applications. It features a robust copper-clad steel center conductor paired with foam polyethylene insulation for minimal signal loss. Protected by a bonded aluminum foil shield and a weather-resistant PVC jacket, this cable ensures durable, long-lasting performance in both indoor and outdoor environments.

Technical Specifications

Cable Type	5C-2V RG6 Coaxial
Shielding	Bonded aluminum foil
Center Conductor	Copper-clad steel
Insulation	Foam polyethylene
Jacket Material	Weather-resistant PVC

Applications & Use

Environment Compatibility

Indoor • Outdoor

Primary Applications	CATV, Satellite TV, Broadband Internet, Professional Installation, DIY Projects
