

RG6 Coaxial Cable with F Connectors

RG6 coaxial cable ensures high-quality signal transmission. It is equipped with two pre-attached F connectors for easy installation with devices requiring a reliable 75 Ohm impedance connection.

Product Overview

Professional Grade Coaxial Connectivity

This high-quality RG6 coaxial cable is engineered for reliable signal distribution across CATV, CCTV, and satellite systems. Featuring a 75 Ohm impedance and robust shielding, it ensures minimal signal loss for demanding professional applications. The cable comes pre-terminated with versatile connector options, providing an efficient, plug-and-play solution for modern communication infrastructure.

Technical Specifications

| | |
|---------------------------|-------------------------------|
| Inner Conductor | 1.02mm Bare Copper / CCS |
| Dielectric Diameter | 4.68 mm |
| Outer Conductor Shielding | Al Foil + 70%, 90%, 95% Braid |
| Jacket Material/Type | PVC/PE |
| Outer Jacket Diameter | 6.9 mm |

Compatibility & Compliance

Compatible Connectors

- F-connector
- BNC

Available Colors

White • Black • Customized

Certifications

CE, RoHS
