

RG6 Coaxial Cable with F-Connectors

This RG6 coaxial cable is designed for high-performance signal transmission. It features durable jackets, securely attached F-connectors, and ensures minimal signal loss for optimal connectivity and clear audio and video quality.

Product Overview

High-Performance Signal Transmission

These RG6 coaxial cables are engineered for superior signal integrity in both residential and commercial environments. Equipped with pre-attached F-connectors, they provide a secure and stable connection for TVs, satellite receivers, and cable modems. Their durable construction ensures minimal signal loss, delivering consistent, high-quality audio and video performance for demanding applications.

Technical Specifications

Cable Standard	RG6
Connector Type	F-Connector
Jacket Color	White

Application Suitability

Compatible Devices

- Televisions
- Satellite Receivers
- Cable Modems

Environment	Residential, Commercial
