

Ribbon Coding Machine for Film and Paper

This ribbon coding machine is designed for printing variable information such as dates, batch numbers, and prices onto film and paper. It utilizes a thermal transfer ribbon to create clear and durable imprints on various materials.

Product Overview

Professional Ribbon Coding Solution

This electric ribbon coding machine is designed for efficient printing of critical information such as manufacture dates, batch numbers, and expiration dates. It is compatible with a wide array of materials, including film, paper boxes, aluminum foil, and plastic composite films. The compact and robust design allows for seamless integration into existing packaging lines while offering adjustable speed and line capacity to meet diverse production requirements.

Technical Specifications

Performance Metrics

220 V

Voltage

50 Hz

Frequency

200 W

Power Consumption

Printing Performance

Feature	Specification
Coding Speed	70-120 items/min
Printing Lines	1-3 lines
Thermal Belt Width	25-35 mm
Coding Distance	Adjustable

Compatibility

Compatible Materials

PT, PE, KT, OPP, CPP, Aluminum Foil, Plastic Bags, Paper, Leather, Cloth

Service & Support

Support Coverage

- 24-hour technical support via email
- Operational and mechanical training
- One-year warranty on the whole machine
- Maintenance support after warranty expiration
