

# Rice Cooker with Steaming Basket

This rice cooker is a versatile appliance for cooking rice and steaming food simultaneously. Its compact design includes a removable steaming basket and a non-stick inner pot for easy cleaning.

## Product Overview

### Versatile Cooking Solution

This compact rice cooker is designed for efficiency, offering both rice cooking and food steaming capabilities in a single unit. It features a non-stick inner pot to ensure even heat distribution and simplified cleaning after use. With an automatic keep-warm function and a transparent lid, it provides convenience and ease of monitoring for any kitchen environment.
