

Rice Grading Machine

This rice grading machine is designed for multilayer sifting of rice. It features a large sifting area and long sifting route, allowing for repeated sifting of both up-sieve and down-sieve materials.

Product Overview

Professional Rice Grading Solution

The DM Serial Rice Grader is a high-performance machine designed for multilayer sifting of rice. It features a large sifting area and a long sifting route, which allows for thorough, repeated sifting of both up-sieve and down-sieve materials. Engineered for reliability, this machine utilizes a drawer-type sieve frame for easy maintenance and features anti-abrasion cleaning blocks to prevent clogging during operation.

Key Features

Operational Highlights

- Multilayer sifting system
- Drawer-type sieve frame for easy cleaning and replacement
- High-flexibility anti-abrasion triangular cleaning blocks
- Low noise operation
- High capacity with low energy consumption
