Product Overview

Professional Rice Hulling Solution

These high-performance rice huller rubber rollers are engineered for efficient and gentle paddy processing. Constructed with premium-grade rubber compounds and a robust cast iron drum, they provide exceptional durability and consistent performance. Designed to minimize grain breakage while maximizing hulling efficiency, these rollers are an ideal component for modern rice milling operations.

Technical Dimensions

Diameter	224 mm
Height	200 mm
Size	8 inch

Material Composition

Rubber Materials Used	SBR, NBR
Drum Core Material	Cast Iron

Performance

Hulling Performance

224 mm
Diameter
