

# Rice Huller with Integrated Blower

This rice huller efficiently removes the husk from rice grains. The integrated blower system separates the husk from the rice, ensuring a cleaner output.

## ADDITIONAL IMAGES

## Product Overview

### Professional Rice Huller and Processor

This industrial-grade rice huller is an essential solution for small to medium-scale milling operations. Engineered for efficiency, it combines a robust hulling mechanism with an integrated blower system to effectively separate husks from rice grains. The machine features a durable frame for stability and adjustable settings to accommodate different grain varieties, ensuring a clean and consistent output for your production needs.

## Technical Specifications

### Finish

Vibrant Red

### Core Functions

Rice Hulling, Corn Milling, Husk Separation

### Power System

Belt-driven system (External motor required)

### Build Quality

Robust heavy-duty steel frame

### Operational Scale

Small to medium-scale milling

## Operation Details

### Processing Workflow

- Feeding via loading hopper
- Mechanical outer husk removal
- Integrated blower husk separation
- Discharge of processed grain
