

Rice Milling and Polishing Machine

This rice milling machine is designed for husking paddy and polishing it into high-purity polished rice. It features a robust construction and high-performance milling mechanism.

Overview

Comprehensive Paddy Processing Solution

This rice milling and polishing machine offers a complete, integrated solution for paddy processing. Utilizing a specialized vibrating sieve and magnetic device, the machine efficiently cleans and prepares grain before passing it through a rubber-roller hulling system. The process combines husking and milling in a single, continuous operation, resulting in high-purity white rice that exceeds national first-class standards while minimizing broken grains and chaff.

Key Features

Operational Benefits

Compact Structure, Low Noise Operation, High Productivity, Energy Efficient, Easy Operation

Performance Metrics

Performance Highlights

2300 kg/h
Max Output

22 kW
Max Power

Technical Specifications

Model Specifications

Model	Output (kg/h)	Power (kW)	Weight (kg)	Dimensions (mm)
GLRP-5D	500-600	5.5	130	860*692*1290
GLRP-10D	900-1200	11	230	760*730*1735
GLRP-30D	1100-1500	15	300	1070*760*1760
GLRP-50D	1800-2300	22	560	2400*1080*2080
