

Rice Milling Machine, 500 kg/h

This rice milling machine is engineered for efficient rice processing. It achieves a productivity rate of 500kg/h and is suitable for small to medium-scale milling operations.

Product Overview

Efficient Rice Processing Solution

The 6N70 Rice Milling Machine is a robust and efficient solution designed for small to medium-scale rice processing operations. It features a streamlined design with a hopper for raw rice feeding, a dedicated milling chamber, and a discharge chute for clean output. Built for durability and stability, this machine ensures consistent performance and reliability in demanding agricultural environments.

Performance Metrics

Productivity Rate

500 kg/h

Output Capacity

Technical Specifications

Power Output	7.5 kw
Power Supply	380V
Gross Weight	140 kg

Physical Dimensions

Host Dimensions (L x W x H)	800 x 520 x 1100 mm
Bucket Dimensions (L x W x H)	500 x 500 x 350 mm

Logistics & Packaging

Packaging	Wooden cases
Included Components	Power unit included
