

Rice Milling Machine

This rice milling machine is designed for efficient and reliable rice processing. It features a robust construction with a steel frame and durable milling components.

Product Overview

Dual-Function Milling Solution

This combined rice and flour milling machine offers a versatile processing solution for small to medium-scale operations. Designed for efficiency and ease of use, it seamlessly handles rice dehulling alongside grinding wheat, corn, turmeric, and chili. Its compact build and reliable output make it an ideal choice for home or small business applications.

Performance Metrics

Throughput Capacity

150 kg/h
Rice Milling

250 kg/h
Flour Milling

Technical Specifications

Supported Materials

- Rice
- Millet
- Corn
- Wheat
- Turmeric
- Chili

Build Quality & Safety

- Robust steel frame construction
- Durable milling components
- Adjustable milling settings
- Protective safety guards
- Integrated emergency stop

Certifications & Standards

Compliance

ISO 9001:2015
