

Rice Milling Roller NF15A

The NF15A Rice Milling Roller is designed for efficient rice milling. It has a durable construction with a hardness rating of 90 degrees and undergoes rigorous quality control with a level 10 inspection rating.

Overview

Precision Milling Component

The NF15A Rice Milling Roller is a precision-engineered component specifically designed to optimize rice milling efficiency. Built for durability and consistent performance, this roller features a high hardness rating to ensure longevity in demanding industrial environments. It undergoes rigorous quality inspection processes to guarantee reliability and operational excellence for your milling machinery.

Technical Specifications

Model Number	NF15A
Hardness Rating	90 degrees
Inspection Rating	10
Product Code	5099012
