## Product Overview

### Precision Components for KB40 Rice Polishers

These high-quality replacement parts are engineered specifically for the KB40 rice milling equipment series. Designed to maintain optimal machine performance and operational longevity, the range includes essential wear components such as milling rollers, screw rollers, and high-precision screens. Built from durable industrial-grade materials, these parts ensure consistent rice processing quality and reliability in demanding milling environments.

## Compatibility and Specifications

### Available Spare Parts

- Emery Rollers
- Milling Rollers
- Screw Rollers
- Polishing Screens

### Key Material Standards

304 Stainless Steel

### Compatible Series

KB40, KB-40G, KB 75

## Technical Details

### Dimension Specifications

Component	Measurement
Primary Screen	1.5 x 501 x 365.2 mm
