

Rice Polishing Machine

This rice polisher is engineered to remove bran layers from rice grains, enhancing their appearance. It utilizes advanced polishing technology to minimize grain breakage and maximize yield.

Overview

Professional Rice Polishing Solution

This industrial rice polishing machine is designed for high-efficiency processing in agricultural facilities and rice mills. The equipment features a stainless steel polishing chamber that ensures hygienic operation and prevents contamination. With advanced water adhesion technology and precise electric sensing controls, it provides uniform polishing results while optimizing output quality.

Key Features

Key Advantages

- Hygienic stainless steel polishing chamber
- Multiple water adhesion system for uniform finish
- Advanced electric sensing for precise performance monitoring
- User-friendly operation and adjustment controls

Technical Specifications

Model Performance Data

Model	Power (kW)	Capacity (kg/h)	Weight (kg)	Dimensions (L*W*H mm)
GLPG14	22	1-1.5	950	1780*940*1860
GLPG16	30-37	1.5-2	1400	1950*1400*1860
GLPG18	37-45	2-3	1800	2070*1540*1990
GLPG21	55	4-5	2400	2940*1540*2070
