

Rice Whitening Emery Rollers and Abrasive Wheels

Emery rollers and abrasive wheels are designed for rice whitening in milling machinery. These components are constructed from high-quality emery and abrasive materials for effective and durable performance.

Product Overview

High-Performance Rice Whitening Components

These emery rollers and abrasive wheels are specialized components engineered for vertical rice whitening machinery. Designed to facilitate efficient primary processing of agricultural products, they ensure effective whitening while minimizing grain breakage. Built with durable, multi-layered abrasive surfaces, these rollers provide consistent performance across various processing requirements.

Compatibility

Compatible Machine Models

- VTA5
- VTA7
- VTA10
- VTA12
- VTA15
- VTA20

Technical Specifications

Available Abrasive Materials	GC, C24
Primary Application	Vertical rice whitening and milling
Construction	Multi-layered abrasive surface
