

Rice Whitening Machine

This rice whitening machine is used in rice milling processes to remove the bran layer from brown rice, resulting in white rice. It is designed for efficient and consistent rice whitening in commercial settings.

Product Overview

Professional Rice Whitening Solution

This rice whitening machine is engineered for high-efficiency rice milling processes, specifically designed to remove the bran layer from brown rice to produce high-quality white rice. Built with a robust construction and a modern aesthetic, it integrates a powerful electric motor and precise control elements. It is an ideal choice for commercial settings requiring consistent and reliable performance.

Technical Specifications

Application	Commercial Rice Milling
Power Source	Electric Motor

Design & Build

Construction	Robust Build • Modern Design
Color Scheme	White, Blue
