

Ride-On Concrete Power Trowel

This ride-on power trowel is designed for finishing concrete surfaces. It features dual control levers for precise maneuvering and headlights for enhanced visibility.

Product Overview

High-Efficiency Concrete Finishing

This ride-on power trowel is engineered for professional concrete finishing on large-scale projects. It features dual control levers for precise maneuvering and an ergonomic seat for operator comfort during extended use. Equipped with integrated headlights and a protective safety cage, it ensures both high visibility and operational safety in various job site conditions.

Key Features

Operational Features

- Dual control levers for precise steering
- Integrated headlights for low-light operation
- Protective safety cage surrounding blades
- Ergonomic operator seating

Application Suitability

Concrete Finishing, Large Area Coverage, Professional Construction
