

Ride-On Electric Floor Sweeper

This ride-on cleaning machine is designed for efficient sweeping of large areas. It is electrically powered, offering a quiet and emission-free operation suitable for indoor and outdoor use on various surfaces.

Overview

Efficient Large-Area Cleaning

The NJ-D1700A is a ride-on electric floor sweeper engineered for high-efficiency cleaning in large commercial environments. Featuring a robust construction, this machine utilizes a dual-brush system combined with a main cylindrical brush to ensure thorough debris removal. Its electric powertrain provides quiet, emission-free operation, making it an ideal solution for both indoor and outdoor maintenance in warehouses, parking lots, and industrial facilities.
