

Ride-On Floor Scrubber with Rotating Brushes

This ride-on floor scrubber is designed for efficient cleaning of large floor areas. It features rotating brushes, a solution tank for dispensing cleaning fluid, and a recovery tank for collecting dirty water.

Overview

High-Efficiency Floor Maintenance

This ride-on floor scrubber is engineered for the rapid and effective cleaning of expansive floor areas in industrial and commercial settings. Designed with operator comfort and maneuverability in mind, it features an intuitive steering system and a robust scrubbing head equipped with rotating brushes. The system integrates both solution and recovery tanks to ensure continuous operation, while built-in safety features like the high-visibility beacon light provide peace of mind in busy environments.
