Product Overview

Professional Liquid Application

The S500 Ride-On Sprayer is a precision-engineered machine designed for the uniform application of fertilizers, pesticides, and herbicides. It features an advanced automatic volume adjustment system linked to motor speed, ensuring consistent chemical distribution. Built for efficiency, the unit includes a durable diaphragm pump protected against dry-running damage and an intelligent, self-resetting electric spray boom.

Technical Specifications

Spray Control System	Teejet 844E
Pump Type	Hypro Diaphragm Pump
Boom Control	Electric Cylinder, Automatic Folding, Elastic Reset
