Product Overview

Professional Ridge Tile Forming Solution

This industrial ridge tile forming machine is engineered for the efficient and high-precision production of roofing ridge tiles. Featuring a robust steel frame construction and integrated hydraulic cutting systems, it ensures long-term durability and consistent output quality. The system includes an automated control panel for precise speed and length management, making it an ideal choice for high-volume manufacturing environments.

Technical Specifications

Forming Stations	1 set
Cutting System	Hydraulic
Custom Production Lead Time	30 days

Key Features

Safety Compliance	Emergency Stop, Protective Guards, Safety Shielding
-------------------	---

Performance

Operational Efficiency

30 days

Max Customization Lead Time

Versatility

Profile Support

- Irregular profile designs
- Curved ridge tile profiles
- Angular ridge tile designs
