

# Ridge Tile Forming Machine

This machine efficiently produces ridge tiles with consistent dimensions. It utilizes multiple forming stations to gradually shape metal sheets into the desired ridge tile profile.

## Product Overview

### High-Performance Ridge Tile Forming

This industrial ridge tile forming machine is engineered for precision and high-volume output. Utilizing robust materials and high-capacity motor power, it delivers consistent profile forming for various metal sheets. It is designed to minimize downtime while maintaining strict dimensional accuracy during the tile production process.

## Technical Specifications

### Motor Power

**5.5 KW**

Motor Power

Roller Diameter	70 mm
Spindle Material	No. 45 steel
Chain Specification	16 A
Cutting Accuracy	± 2 mm / 10 m
