

Right Angle Gearbox for Drilling Machines

This right-angle gearbox is designed for drilling machines used in agriculture. It provides efficient power transmission and optimal space utilization.

Product Overview

High-Performance Drilling Gearbox

The GTM-ZK40 is a robust right-angle gearbox specifically engineered for drilling machines in agricultural applications. Its precision-engineered gears and bearings minimize friction to maximize power transmission efficiency while ensuring a long service life. Designed for easy integration, this gearbox offers a cost-effective and reliable solution for demanding agricultural drilling needs.

Technical Specifications

Gear Configuration

Right-Angle

Model Number

GTM-ZK40

Primary Application

Agricultural Drilling Machines

Performance & Build

Key Features

- Precision-engineered gears
- High-durability bearings
- Optimal space utilization design
- Low-friction operation

Construction Benefits

Durable Materials, Efficient Power Transmission, Easy Integration, Extended Service Life
