

Right Angle TNC Male Coaxial Connector

Right angle TNC male connector designed for coaxial cable termination. It features durable construction for reliable signal transmission.

Overview

Professional RF Connectivity

The Right Angle TNC Male Coaxial Connector is precision-engineered for reliable signal transmission in demanding RF applications. Its right-angle design allows for efficient cable routing in confined spaces, ensuring optimal performance without compromising signal integrity. Built for durability, this connector is an essential component for professional-grade coaxial cable termination.

Technical Specifications

Construction

Durable • Reliable

Connector Type

TNC Male

Orientation

Right Angle

Suitable Applications

RF Systems, Coaxial Cable Termination, Signal Transmission
