Product Overview

Rigid Conduit Bushing

This rigid conduit bushing is designed to securely terminate threaded rigid or IMC conduit to metal boxes and enclosures. It features a smooth, rounded surface at the raceway entrance to protect wire insulation from damage during the pulling process. Engineered for durability, it is suitable for both wet and dry environmental installations.

Technical Specifications

Material	Zinc Alloy
Finish	Polished
Compliance Standards	UL 514B, CSA C22.2 NO.18.3-12
UL File Number	E472251
