

Ring and Block Magnets

These ring and block magnets are designed for specialized applications requiring exceptional magnetic flux. They are available in various sizes and materials to meet specific performance requirements.

Product Overview

High-Performance Magnetic Solutions

These ring and block magnets are engineered for specialized, high-demand industrial applications. Designed for exceptional magnetic flux and manufactured to precise tolerances, they provide superior stability and long-term reliability. They are the ideal choice for demanding environments where performance and corrosion resistance are critical requirements.

Technical Specifications

Common Applications

- High-power motors
- Generators
- Magnetic separation systems

Availability

Customizable Sizes • Various Materials

Performance Features

High magnetic flux, Precise tolerances, Superior stability, Corrosion resistance
