

Ring Die Feed Pellet Mill

The Ring Die Pellet Mill is feed pellet equipment that grinds materials like corn, soybean meal, straw, grass, and rice hulls into particle fodder. It is suitable for large, medium, and small aquaculture factories, grain feed mills, livestock farms, and poultry plants.

Product Overview

About SZLH32 Ring Die Pellet Mill

The SZLH32 is a specialized ring die pellet mill designed for the efficient production of high-quality animal feed. It is capable of processing diverse materials including corn, soybean meal, straw, grass, and rice hulls into uniform particle fodder. Engineered for reliability, it features advanced alloy steel components that provide excellent fatigue and wear resistance for continuous industrial operation.

Suitable Industries

Aquaculture, Livestock Farming, Poultry Plants, Grain Feed Mills, Private Farming

Key Features

Construction Highlights

- Premier alloy steel principal axis and hollow shaft
- High fatigue and wear resistance structure
- Central pressure adjustment system for material versatility
- Automatic timing oil feeding and lubricating system

Operational Efficiency

1 High

Operational Stability

1 Auto

Lubrication System
