

# Ripper Shanks for Earthmoving Equipment

These ripper shanks deliver high wear resistance and increased production efficiency. Their durable construction provides high reliability, hardness, and toughness, along with high fatigue resistance.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Ripper Shanks

These heavy-duty ripper shanks are engineered for demanding earthmoving applications, including construction, demolition, and agricultural work. Constructed from high-strength steel, they provide exceptional durability and long-lasting performance when loosening soil or rock. Featuring adjustable mounting configurations and reinforced tips, these components ensure efficient ground penetration and reliable operation under pressure.

## Compatibility

### Supported Machinery

Bulldozers, Excavators, Loaders, Electrical Shovels
