

Ripper Tip 9W4551 for CAT D9 D10 D11 Bulldozers

This ripper tip is designed for CAT D9, D10, and D11 ripper systems. The short design enhances maneuverability and precision in ripping operations.

Product Overview

Heavy-Duty Ripper Tip 9W4551

The 9W4551 Ripper Tip is a robust replacement part engineered specifically for heavy-duty ripping applications in construction, mining, and earthmoving. Its short design is optimized to enhance maneuverability and precision during operation, ensuring consistent performance in demanding environments. Manufactured from high-quality materials, this component provides excellent wear resistance and extended service life to help maximize productivity and minimize equipment downtime.

Compatibility

Compatible Machinery

D9 Bulldozer, D10 Bulldozer, D11 Bulldozer

Key Features

Design Benefits

- Short design for improved maneuverability
- High wear resistance for extended service life
- Engineered for extreme conditions
- Secure fit for efficient energy transfer

Application

Primary Industries

Mining • Construction • Earthmoving
