

RJ11/RJ45 Crimping Tool

This professional-grade crimping tool is designed for terminating RJ11 and RJ45 connectors. Its durable construction ensures long-lasting performance, while ergonomic handles provide comfortable use for secure and reliable crimps on network and telephone cables.

Product Overview

Professional Crimping Solution

This professional-grade crimping tool is engineered for the reliable termination of RJ11 and RJ45 connectors. Built with durable materials, it ensures long-lasting performance for demanding data and voice installation environments. The ergonomic handle design enhances user comfort during repetitive tasks, making it an essential tool for network and telephone cable maintenance.

Technical Specifications

Primary Applications

- Network cabling
- Telephone installations
- Data communications

Compatible Connectors	RJ11, RJ45
Model Number	SC1101

Key Features

Design Highlights

Ergonomic Handle • Durable Construction • Dual-Purpose Design
