Product Overview

产品细节 | Product

Durable wall-mounted interface for organized network cabling

Professional Ethernet Connectivity

This RJ45 Ethernet faceplate provides a reliable and clean termination point for indoor network cabling installations. Designed for durability, the unit is constructed from high-impact, flame-retardant materials, ensuring safety and performance in professional environments. The versatile design supports multiple port configurations and is compatible with standard keystone jacks for seamless integration into various infrastructure projects.

Technical Specifications

1.86type

2.1 port,2 port,3 port,4 port.surface mount box

3.Apply to ul194v-o high -impact fire-retardant ABS or PC resin.

4.OEM service allowable.

Configurable port layouts for various installation requirements

Port Options

- 1 Port
- 2 Ports
- 3 Ports
- 4 Ports

Material	High-impact flame-retardant ABS or PC resin (UL94V-0)
Compliance	ISO9001, ISO14001, ISO18001, CE, RoHS, Fluke Tested
Installation	Indoor surface mount
