

# RJ45 Ethernet Patch Cord

This network patch cord cable is designed for reliable data transmission. It features RJ45 connectors on both ends for universal compatibility with Ethernet devices.

## ADDITIONAL IMAGES

## Product Overview

### Reliable Connectivity Solution

This RJ45 Ethernet patch cord is engineered for high-performance data transmission across telecommunication and computer network environments. Featuring a flat cable design and durable construction, it provides a stable and secure connection for routers, switches, and other networking devices. Available in a wide range of lengths and color options, this cable is built to meet versatile installation requirements in both office and data center settings.

## Physical Characteristics

Cable Shape	Flat
Conductor Specification	7/0.20mm
Conductor Material	CCA
Jacket Materials	PVC, LSZH

## Technical Specifications

Cable Structure	4 pairs
Shielding	UTP (Unshielded Twisted Pair)
Connector Type	RJ45

## Availability

### Available Colors

Grey • Blue • White • Black • Yellow • Pink • Orange

### Available Lengths

1m - 40m

## Applications

### Primary Applications

- Telecommunication
- Computer networks
- Instrumentation
